

# SEVEN PATTERNS

A Progressive Design Stack for Information Systems

- 1

**Identity**  
Distinguishing one thing from another
- 2

**State**  
Recording attributes
- 3

**Relationship**  
Connecting identifiable things
- 4

**Event**  
Recording that something happened
- 5

**Flow**  
Value or information moving between agents
- 6

**Constraint**  
Rules governing valid states and transitions
- 7

**View**  
Presenting information for a purpose

*Every system you've ever used is built from these layers. Techne teaches you to see them.*

## Support Techne at RegenHub

Help us build commons-owned intelligence infrastructure in Boulder.
