

TECHNE

CORE PRINCIPLES

01 Augmentation over Automation

Technology extends human capability, not replaces it

02 Collective Intelligence

Intelligence emerges from relationship, not computation alone

03 The Craft of Composition

Mastery is recognizing which patterns a problem requires and composing them with fluency

04 Bootstrapping

Using your tools to improve your tools — the compounding engine

05 Commons Ownership

Infrastructure owned by the people who use it

06 Grounded in Place

All coordination happens somewhere — in a watershed, a season, a building

07 Articulation as Capability

The ability to express what you want clearly is the foundational skill

Support Techne at RegenHub

We're building an integral technology learning center and Ethereum community hub in Boulder, Colorado. Consider supporting our mission on Artizen.
